

I was made known that you are considering replacing local community radio with LPFM, which would provide other programming. I am strongly opposed to this. I listen to K-LOVE Radio station on 106.7 broadcast from . This radio station greatly impacts our local area, as being a family oriented station. There are not many stations today that a family can listen to without worrying what our children hear. Please protect this station and others like it by not replacing this with LPFM and other programming. Thank you.
